Let's Start!

Let's take a trip to the Lost City!

Learning Outcome

Accurately use information about travel and vacations in social situations.

Ask your partner:

- How much do you know about Machu Picchu?
- What other historical places do you know?

Can Do Statements

- I can talk about places and attractions.
- I can ask and say how far a place is.
- I can ask and report about things and events.

Let's Explore!

John talks about Machu Picchu. Why does the group have to **take it slow***?

* To "take it slow" means to walk slowly.

Instructions: Read the text aloud.

Machu Picchu is an ancient Inca city. Sitting on top of a high mountain, it is a very beautiful and interesting place. Machu Picchu is called "The Lost City" because it was hidden in the jungle for 400 years. No one knew where it was until Hiram Bingham found it in 1911. For the Incas, this city was a religious center. They built beautiful stone temples there and prayed in them.

Today we can still see the ruins of these incredible buildings. They help us imagine what the Inca world was like a long time ago. The altitude is 7870 feet above sea level, so the air is very thin. There is a danger of getting altitude sickness, so take it slow.

Let's Practice!

It's how far above sea level?

Instructions: Organize the mystery sentences. Write each word in the correct order.

1. is/above/feet/level/sea/altitude/The/7870.

2. Lima/300/from/Picchu/Machu/is/miles.

3. is/from/Florida/miles/2619/Peru.

4. far/How/Lima/here?/from/is

5. sea/is/above/far/it?/How/level

Let's Practice!

When was Machu Picchu found?

Instructions: Select the correct answer.

1. Why do they call it the "lost city" ?

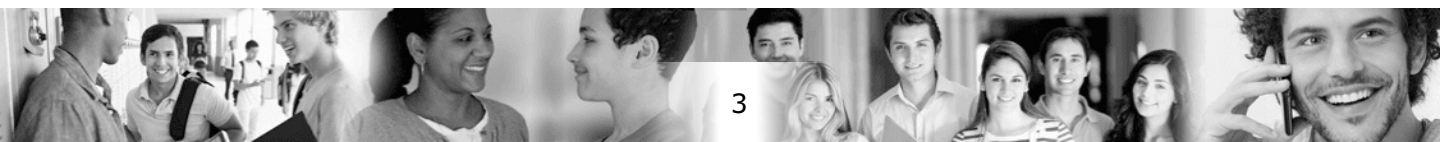

- ☐ Machu Picchu is called the "lost city" because Hiram Bingham found it.
- ☐ Machu Picchu is called the "lost city" because it sits on top of a mountain.
- ☐ Machu Picchu is called the "lost city" because it was hidden in the jungle for 400 years.

2. When was it found?

- ☐ Machu Picchu was found in 1911.
- ☐ Machu Picchu was found in 1910.
- ☐ Machu Picchu was found in 1912.

3. Machu Picchu is a very beautiful and _____ place.

- ☐ interesting
- ☐ interested

Extension Activity

Find out more about Machu Picchu!

Instructions: Complete the following steps. Fill in the Self-Assessment.

- With a partner, think of 6 questions you would like to find out about Machu Picchu.
- Go online to find answers to your questions.
- Write 5-8 of your own original sentences.
- Read your paragraph to a partner.

Self-Assessment

Yes

No

I ask questions about Machu Picchu.

☐ ☐

I read and answer questions about Machu Picchu.

☐ ☐

I write a paragraph with my research information.

☐ ☐

I read my paragraph to a partner.

☐ ☐

Target Words

- hidden** (adjective): secret; out of view
e.g. Machu Picchu was hidden for 400 years.
- jungle** (noun): an area with many trees and tropical plants
e.g. Machu Picchu was hidden in the jungle.
- to pray** (verb): to speak to God; to ask for something from God
e.g. The Inca prayed in temples at Machu Picchu.
- altitude** (noun): the height above the sea
e.g. The altitude of Machu Picchu is 7870 feet.
- temple** (noun): a place where people get together to pray and celebrate God
e.g. The Inca built beautiful stone temples.
- religious** (adjective): relating to or believing in God
e.g. The city was a religious center.
- thin** (adjective): having little oxygen (in air)
e.g. The air is very thin at Machu Picchu.

Learning Points

Asking How Far a Place Is

When you want to know how far a place is, you can use the question: *How far is ... ?*

You can reply with a specific distance if you know the answer, like *It's 50 yards away.*

The United States uses the Imperial system, not the metric system.

If a place is nearby, you use yards to say how far it is.

If a place is far, you use miles to say how far it is.

You can say the altitude when you talk about how far up somewhere is on a mountain. You use the phrase "above sea level" to talk about altitude.

Imperial System	Metric System
1 mile	1.6 kilometers
1 yard	90 centimeters
1 foot	30 centimeters
1 inch	2.5 centimeters

Examples:

- *How far is the mountain from here?*
- *It's 12 miles away.*
